

# Good Design for Egoé. Three times.

A true mark of quality has reached Bílovice. Our collections of outdoor furniture **Moja and Barka** and the **car camping kit Nestbox** all won the prestigious Good Design Award 2020. Behind the designs for award-winning products was none other than **studio 519**.

The first two mentioned won in the category of Furniture. The collection **Barka** by its very name alludes to staying by the water, freedom and free space. All products of this collection are based on a wood and steel supporting frame for providing spacious seating. The backrest part is fitted with outdoor fabric. To create even greater comfort, you can supplement sitting with seat cushions or armrests made from exterior fabric. The collection also features a stool that can be used not only for sitting, but also as a side table.

Our collection **Moja** will convince you that upholstered furniture is no longer a privilege only for interiors. A steel structure, backrest, footstool and table made of quality outdoor mesh and upholstery made of durable outdoor materials - this is Moja. Add a few pillows and you might easily forget that you are not sitting at

home in the living room, but actually on the terrace or in the garden.

The third "Good Design" from Bílovice is the **car camping kit Nestbox**. It magically turns your car into a mobile home on wheels. There is also a small but functional kitchen, refrigerator, storage space for all your stuff and high-quality mattress. Just place Nestbox in the trunk of your vehicle and you can head out to seek adventure wherever your heart, or the navigation system, draws you.

## About the award

**Good Design** is hands down the oldest and still one of the most prestigious design awards. It is organized by the Museum of Architecture and Design The Chicago Athenaeum. Standing at the birth of the prize in 1950 were the designers Charles and Ray Eames, Russel Wright, George Nelson and Eero Saarinen. Over its existence, it has bestowed over 40,000 awards in such areas as design and innovation, sustainability, creativity and use of materials.
